

# Introduction to Socitm Advisory

**Northern, Yorkshire and Humber  
Professional Network of  
Informatics/Digital Directors**

**11 March 2022**

*Russ Charlesworth, Practice Director, Integrated Care*

*Nick Parker, Senior Consultant, Integrated Care*

# The Socitm Advisory difference

A company for the Public Sector

We utilise data and information from Socitm's membership organisation

Extensive portfolio of successful programmes

A strong network of Public Sector connections

Independent – tailored solutions that meet *your* needs

Blend of Public Sector and Private Sector skills

Over the last 6 years, we have shared £1.1m in dividend payments back to Socitm membership, that has been diverted into public services. This includes highly successful programmes like the Leadership Academy and Socitm Research

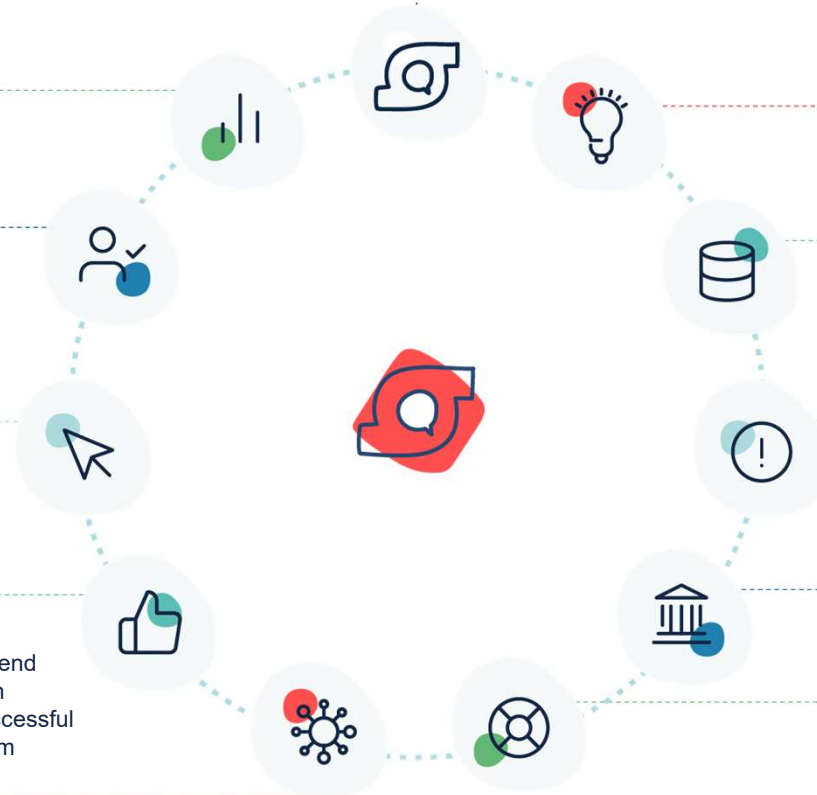

We've been there and done it from within the Public Sector

Offering specialist skills councils struggle to hire and retain

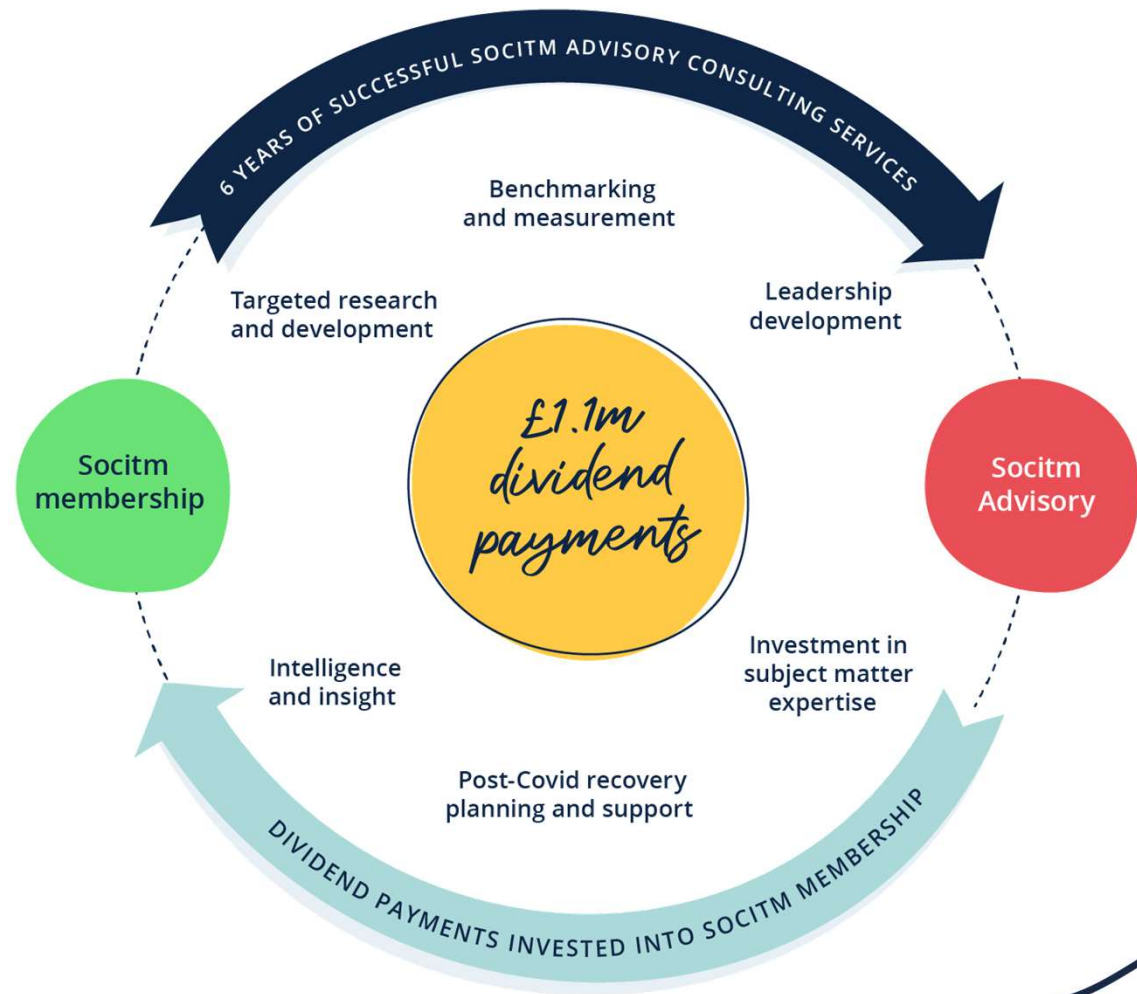

A unique view of what councils are really doing, shared data from similar organisations

Understanding of Public Sector governance

Value retained in local government services via dividend payment

# Paying back into the Public Sector

# Supporting you in the adoption of digitally enabled integrated care

Our objectives:

## **Strategic direction setting and decision making**

We will help you define your future service model and the technology you need to enable it.

## **Selecting the right solutions**

We can help you procure the right solutions to meet your financial and business requirements.

## **Delivering the solutions**

We can help you design and deliver your future service model using an agile, data-driven and user-centric approach.

## **Delivering business benefits**

We will help you manage and realise the intended benefits you need from your future service model.

# Lancaster - Digital Integrated Care Hub

## What did we deliver?

- Concept for a new hybrid, Digital & Physical Community Hub for c.90k residents
- Aligned the Community Hub Proposal to the Bay Health and Care Partners and ICS Priorities
- Set out the rationale for the new Model of Care (Hub) and proposed how it will be developed
- Described the benefits the new Hub will potentially bring to patients and communities
- Discussed high-level principles underpinning the delivery of the new Hub
- Considered the ways in which the Hub must be implemented to achieve the anticipated impact and value for money at the same time as avoiding any adverse impact on existing services.
- Co-delivered with ICS, Integrated Health Partners and Lancs & Midlands CSU

# H&NWE STP - Estates Strategy

## Mission

- Key aspects of the local context
- Core principles that should underpin future estate developments
- Current baseline position - 19 programmes and 58 projects
- Identify opportunities to improve cost effectiveness
- Layout future governance and delivery arrangement options

## Approach

Analysed key current estate space reviews e.g. admin versus clinical, etc.

Geo-mapped integrated care options across Acutes, MH, CH, PCN and third sector

Liaised across key workstreams e.g. Emergency Care, Digital, to ensure all interdependencies are surfaced, reported and actioned

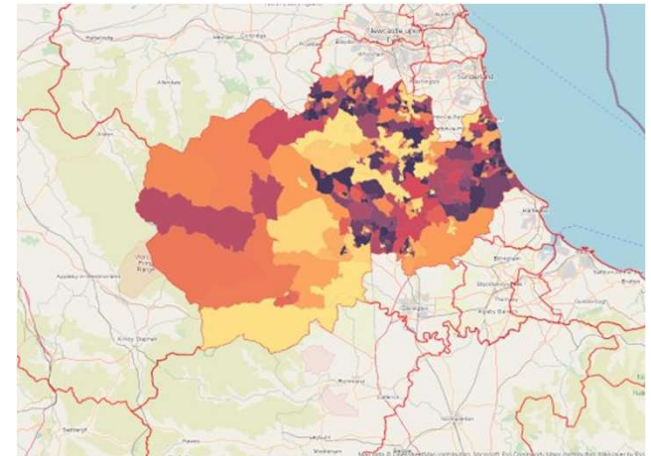

Forensic review of investment proposals to gauge alignment with STP strategy

Asset disposal identification and analysis e.g. capital receipt/revenue reduction impact

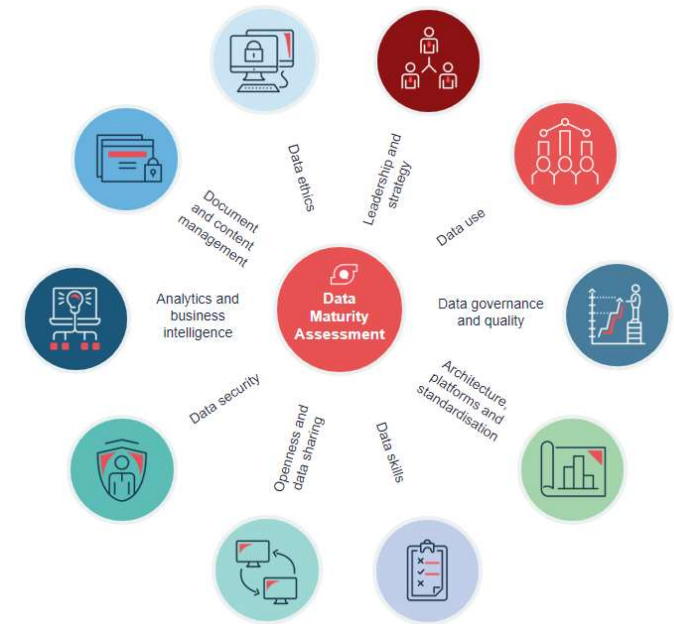

# Durham TEC Strategy

- To challenge, validate and change
- Discovery – surveys, interviews, workshops
- Cohort data
- Performance data
- TEC Operational Team
- Vision
- Ambition and Enablers
- Strategy

# Future Ambitions

- Place based data
- Costed digital strategy roadmaps
- WGLL - Place and Care
- ICS memberships
